## What is Hyperbaric Oxygen Therapy (HBOT)?

Hyperbaric Oxygen Therapy (HBOT) is a medical treatment that involves breathing pure oxygen in a chamber pressurized to double or triple the atmospheric pressure. This treatment allows oxygen to dissolve into the bloodstream at higher concentrations, promoting healing and recovery. HBOT can be applied in both therapeutic and wellness settings to improve health and performance.

## What are the main fields of treatment for Hyperbaric Oxygen Therapy (HBOT)?

### 1. Medical Applications:

- Decompression Sickness: Standard treatment for divers.
- Chronic Wound Healing: Accelerates healing for diabetic ulcers and wounds.
- Neuropathy & Peripheral Vascular Disease: Improves blood flow and reduces symptoms.
- Radiation Injury Recovery: Heals tissue damage post-radiation therapy.
- Infection Control: Boosts immune response and helps fight infections.

### 2. Aesthetic & Anti-Aging:

Skin Regeneration: Improves collagen production and skin elasticity.

### 3. Sports & Performance:

Faster Recovery: Reduces muscle soreness and inflammation.

Endurance Enhancement: Increases stamina and reduces fatigue.

### 4. Mental Health & Cognitive Function:

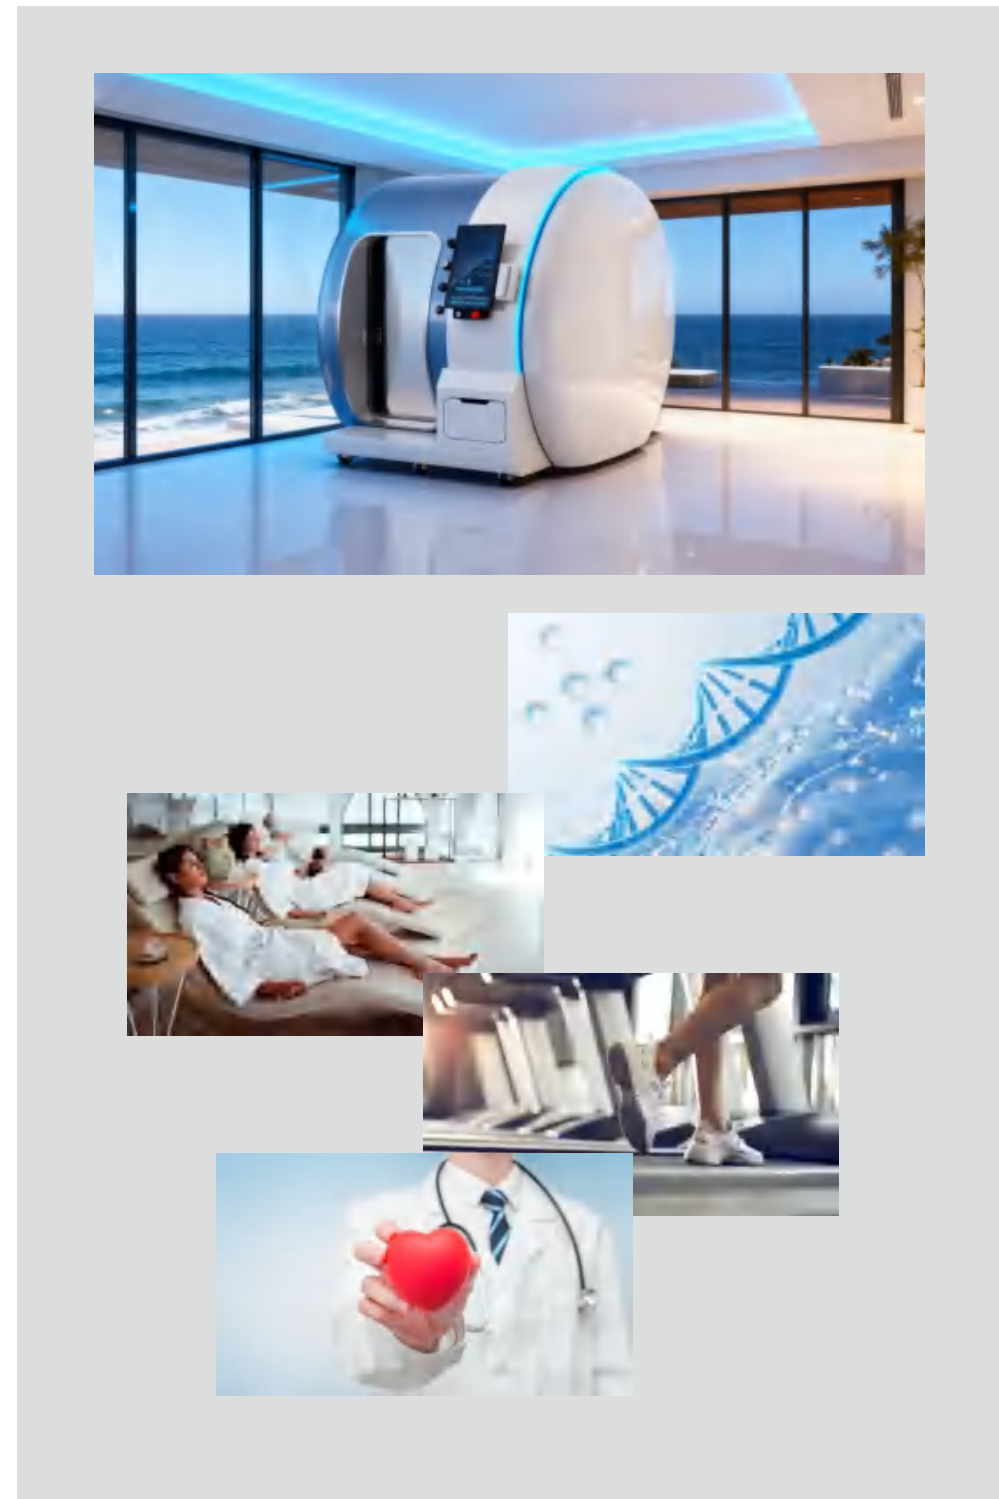

Trauma & PTSD: Supports recovery from trauma and improves brain function.

Cognitive Enhancement: May assist in reducing cognitive decline and improving focus.

### 5. Wellness & Preventative Care:

Immune System Boost: Enhances immune function and overall health.

Detox & Anti-Inflammatory: Reduces chronic inflammation and promotes cellular repair.

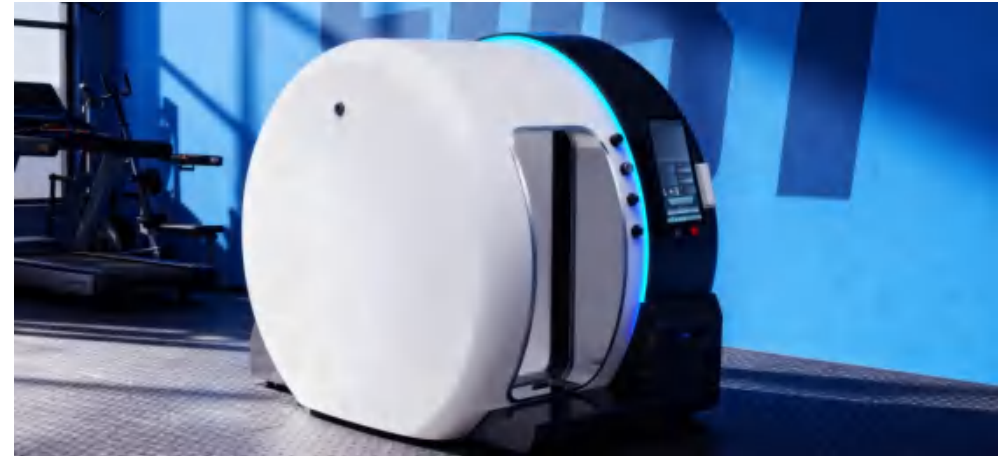

# System Components

- 2 People Sitting Chamber With BIBS Mask
- 2 x 20L Oxygen Concentrator
- 1 x 400L Air Compressor
- 1 x Air Conditioner

# Multiplace Hyperbaric Chambers

We build Multiplace HBOT chambers focusing on user accessibility, interaction, and experience. Our systems provide controlled pressure & pure oxygen delivery with the BIBS mask, innovative design, and comfortable interiors.

## Healthcare is personal, with a focus on "You-time".

Our Multiplace hyperbaric chambers provide a highly customizable experience, allowing treatment protocols to be tailored to individual needs. Whether you prefer sitting or lying down, our chambers cater to various comfort preferences. The design ensures total visibility, helping to reduce claustrophobia, so you can focus on your therapy with ease.

## Designed with comfort and privacy in mind

Multiplace chambers offer a peaceful, personal space for your therapy. The option to sit or lie down provides flexibility, and the spacious design promotes relaxation. Total visibility within the chamber creates an open environment, giving you a sense of comfort and solitude during each session, making it a perfect setting for meditation and rejuvenation.

## Lower Investment and Operating Costs

Multiplace chambers offer an affordable solution for smaller clinics or individuals beginning hyperbaric oxygen therapy. With a lower initial investment and minimal operational costs, they represent a highly practical option. Their easy-to-use, mirrored controls enable independent operation, which reduces the need for additional staff and contributes to long-term savings.

## Customizable Options to Empower Your HBOT Experience

Multiplace chambers come with a variety of optional upgrades and accessories to enhance your therapy. Choices range from custom paint colors, leather finishes, and stitching to a selection of chair models. For those seeking the ultimate in luxury and comfort, high-end options such as Alcantara leather interiors and the Maybach seat are also available.

Eco-friendly Materials for chamber and Interior

40mm PC aviation-grade material door is safer.

Top-tier global components with SIEMENS pressure relief valve and SMC filter.

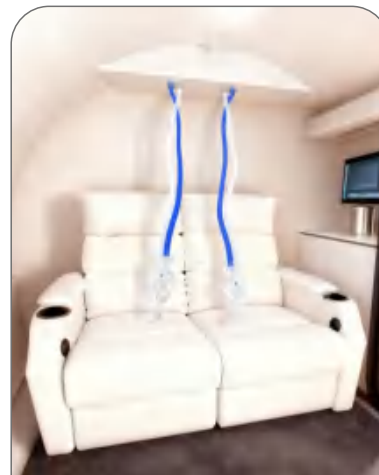

Dual-core drive, efficient oxygen generation | Modular split design, unified performance.

22" Intelligent control HMI with 7 preset modes and one-click switching.

Operation data monitoring — Pressure curve chart.

# Technical Specifications

Module	Name	Parameter
Chamber Module	Model No	OLV-YZM02
	Material	Aluminum Alloy
	Chamber Dimension	L2230mm*W1900mm*H1970mm (L88*W75*H78 Inch)
	Pressure	2ATA
	Weight	750kg
	Door thickness	40MM
	Noise	≤60DB(A)
	Voltage	AC 240V/110V,50/60Hz
	Input Power	200W
Include	BIBS breathing system, Double sofa, 43-inch TV, Air conditioning, Intercom, Interior/Exterior Control Panel, Emergency stop button, Emergency pressure relief device.	
Air Conditioning Module	Exterior Dimension	L365*W445*H600MM
	Interior Dimension	L530*W170*H260MM
	Exterior Weight	30KG
	Interior Weight	4KG
	Temperature Range	2-10°C
	Air Volume	420m <sup>3</sup> /hour
	Wind Speed	5m/s
	Power	200W

Module	Name	Parameter
Air Booster Module	Model No	OLV-YCZ01
	Dimension	L500mm*W400mm*H960mm (L20*W16*H38Inch)
	Weight	100kg
	Output pressure	>350Kpa
	Air Flow	>400L/min
	Noise	≤60DB
	Voltage	AC 240V/110V,50/60Hz
	Power	3100W
Oxygen Module	Model No	OLV-YC20S
	Dimension	L500mm*W400mm*H960mm (L20*W16*H38Inch)
	Weight	90kg
	Output pressure	>200Kpa
	Oxygen Flow	0-20L/min (x2)
	Oxygen Purity	93±3%
	Oxygen Outlet Pressure	>350Kpa
	Noise	≤60DB
	Voltage	AC 240V/110V,50/60Hz
Input Power	1450W*2
